The *Journal of Information Technology Impact* (JITI) is a scholarly, peer refereed journal that provides a forum and means for exchanging information on the social impact of information technologies. JITI's scope includes the effects of information technology on business, socialization, entertainment, and education. The Journal publishes high quality opinion papers, original research articles, short experimental reports, review monographs, technical notes, as well as special, thematic issues with commentaries.

Audience

The Journal is unique in providing a diverse forum for those interested in the effects of theories or implementation of information technology. It, therefore, promotes an exchange of information between groups not always thought to share a common interest. In general, JITI is designed for the following audiences: researchers, developers, and practitioners in schools, industry, and government; administrators, policy decision-makers, and other specialists in computer information systems.

Topics

The topics covered by JITI include but are not limited to: Information Technology's impact on economies, underdeveloped countries, politics, education, learning, people with disabilities, journalism, aerospace, criminal justice, law, healthcare, hospitality industry, transportation, communications, human behavior, human relations, women's empowerment.

Sample Papers

Can the Adoption of a Leaner Medium Increase Group Outcome Quality?, Ned Kock • Citizen Electronic: Marx and Gilder on Information Technology and Democracy, Roger White • Net Gains: Does Access Equal Equity?, Leslie Shade • The Impact of an Electronic System as a Decision Making Tool for Special Education, Courtney Frantz • Online Computer Scoring of Constructed-Response Questions, Richard Vigilante • The Impact of Technology on U. S. Higher Education: A Philosophical Approach, Marcel J. Dumestre • Complementation: An alternative to automation, Paul Schutte • Alerting System Assertiveness, Knowledge, and Over-Reliance, Stuart D. Davis & Amy R. Pritchett

Call for Papers

Authors are invited to submit high quality papers that match the Journal's scope. The Journal considers for publication full-length articles and short-length articles of 1000 words or less. Short-length articles can generally be published sooner than full-length articles. All manuscripts must be submitted electronically. Authors should consult the "Author's Guidelines" published in the Journal's web site (<http://www.jiti.net>) for the detailed preparation of their manuscripts
